

Solidifying numpy, pandas, and matplotlib knowledge

HAS Tools - Oct 4, 2022

Agenda for today

- Reminder: Homework due at midnight!
- 8:05-8:30: Homework group time
- 8:30-8:40: numpy exercises
- 8:45-9:05: numpy exercises with groups
- 9:05-9:15: introducing homework for the week

Homework due Oct 11 @ midnight

- Goal is to develop some “muscle-memory”/intuition around basic data manipulation tasks with numpy + pandas
- 15 exercises each. You’ve already worked on the numpy ones.
- Full assignment will be released later today in your homework repositories - will send out email when available
- You are allowed to work together!
- Complete 10 out of the 15 correctly for each for full credit.
- They can be done in any order - if one doesn’t “click” for you, move on
- Completing 25 total correctly will get 1 point extra credit, completing all 30 correctly will get 3 points extra credit
- Great source of extra explanatory information:
